PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable, production-grade web and backend systems using TypeScript, Node.js, and React. Experienced in designing distributed microservices, asynchronous processing pipelines, and high-throughput APIs using RabbitMQ and Redis. Passionate about performance, reliability, and building cloud-ready platforms that operate at scale.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python (Basics), Go (Basics), SQL

Frontend: React, Redux Saga, HTML5, CSS3, Material UI

Backend: Node.js, Express.js, REST APIs, Microservices Architecture

Databases: MongoDB, MySQL, Redis

Cloud & DevOps: Docker, CI/CD Pipelines, Containerization, Git, GitHub, Azure Fundamentals (Conceptual)

Messaging & Systems: RabbitMQ, Event-Driven Architecture, Caching Strategies

Testing: Jest, Cypress

Core CS: Data Structures & Algorithms, Operating Systems, OOP, DBMS

EXPERIENCE

Marmin Technologies — Junior Software Engineer

Oct 2024 – Present

Major Contribution Malaysia Invoicing System

- Designed and developed scalable backend microservices using Node.js, TypeScript, Express.js, React.js improving throughput by 30%.
- Built Shopify integrations (using Admin APIs & webhooks) to automate order processing, product sync, and third-party system communication.
- Implemented asynchronous processing pipelines using RabbitMQ, enabling reliable inter-service communication and efficient background job handling.
- Optimized performance by implementing Redis-based caching, significantly reducing API response latency and database load.
- Developed secure, high-performance RESTful APIs handling large-scale transactional data and high concurrent traffic.
- Containerized applications using Docker and contributed to CI/CD pipelines, ensuring smooth and reliable production deployments.
- Improved system reliability through unit and end-to-end testing using Jest and Cypress.
- Collaborated cross-functionally in an Agile environment, contributing to end-to-end feature delivery across backend and frontend systems.
- Built reusable and performant React components and integrated APIs to enhance user experience and application responsiveness.
- Participated actively in code reviews, enforcing best practices for clean architecture, scalability, and maintainability.

PROJECTS

Role-Based Access & Duty Scheduling Platform

Tech: React, Node.js, Express.js, MongoDB, JWT

- Designed a scalable Role-Based Access Control (RBAC) system to manage authorization across multiple user roles.
- Built secure authentication and authorization flows using JWT-based access management.
- Implemented modular frontend architecture using reusable React components for maintainability.

RaktDaan — Blood Donation Platform

Tech: React, Node.js, Express.js, MongoDB

- Developed full-stack platform enabling real-time user interaction, search/filtering, and secure data management.
- Designed REST APIs for managing structured user and donation data workflows.
- Implemented responsive UI and validation logic to improve usability across devices.

EDUCATION

Master of Computer Applications (MCA) — Vellore Institute of Technology (VIT)

Aug 2023 – Jun 2025

CGPA: 8.90

Bachelor of Computer Applications (BCA) — Shri Guru Ram Rai University (SGRRU)

Aug 2020 – Jun 2023

CGPA: 8.49

ACHIEVEMENTS

- Solved 250+ Data Structures & Algorithms problems across GeeksForGeeks and HackerRank.
- HackerRank Certified (C++) with 5★ rating.
- Published research paper on IoT Security — JETIR (May 2022).
